The end of tech and the beginning of something more

Back in 2017 they did not even know what tech was but that's in the past.so lets not worry about that hear in the year of 9715 we have it all you name it we have it but that's enough about my town let's get to the story there is a kid named jack.jack was a kid that had no tech.All the other kids made fun of him but jack tried his best to ignore. However that was not a bad thing because the next day all people with tech got something called the virus. It turns you evil beyond compare and jack wasn't jack had no tech so it didn't affect him but jack wasn't the the only one he had 4 friends that had no tech they are the only all 5 of them where the last hope for mankind they all met up and shared their names ill start my name is jack i'm next my name is sean my names kate and i'm kelly so they went to kill the virus.with old tech 15 hours later everyone is cured and i don't think they'll ever use tech again now we just need to stop the one who made the tech so it won't happen again let's do this said jack they went to the flying island the tech was made that's where we thought he was and we were wright we took him down then the onec he was dead the island fell from the sky and all was lost or was it...???

The end
