

Say hello to the new and approved nova scotia!

Hi I am going to tell you about when I was ten time traveling to the future to 20 years later so I was 30 and now let's talk about the future so ... I got there and when I arrived and got out of the portal it came out on the road so I turned around and it was the most Amazing beautiful appearance but seriously nobody could miss it .It was so so so big it couldn't have been but it was the biggest mansion and it was so beautiful and it didn't look like anyone lived their. So I closed my eyes and I quickly opened the door and it was the most beautiful and it was beautiful inside the walls were made of shaved forest logs and the flooring was hard wood and the best part was the mansion had 2 kitchens 4living rooms one basement ten bedrooms and 6 bathrooms. So after I seen the whole house I went outside and the deak was as big as a house and the mansion had an in ground pool that was 9 feet deep and the mansion was on a lake and then I went in to the front yard and the road that it was is carter road and then I went to the garage and there was a light red electric volkswagen a dark

blue electric honda s.u.v and a sparkly light gray lamborghini but then I went to the city and by the looks of things there was no bad people no homeless people and the grocery stores made machines that give you the the food you want and 7 years later I went back home.
