

Brooklyn Allen

My future

I think that school can be made out of slime and maybe it will have **100** floors and the slime will be blue the windows will be made out of glue and the stairs will be made out of laundry detergent.

Homes.

I think that the house will be able to fly and they do not need gas which means that you do not need to spend **50** Dollars Every weekend **omg** that is amazing I would love to have that house especially my mom.

Cars

I think that the cars will be on hoverboards and it will have one wheel in the middle it is red and it has bluetooth isn't that awesome **omg!**
